I. Introduction

In January 2016, Mano a Mano launched a strategic planning process to guide its vision for the next three years. Mano a Mano engaged Millennia Consultants to facilitate the process. This document represents seven months of collaborative work, incorporating input from the Board, Mano a Mano leadership and staff, as well as external stakeholders.

Millennia Consulting’s approach to strategic planning is participatory and comprehensive. The planning process included an analysis of the current situation, establishment of strategic directions and goals, and the development of an action plan. Each step in the planning process was performed in a participatory environment, with input sought from all parties and active dialogue encouraged.

This plan is meant to be a living document, designed to help focus the efforts of the Mano a Mano Board and staff as they continue to develop services and programs that are responsive to the needs of their constituents.

II. The Strategic Planning Process

Current Situation Analysis — The focus of this phase of the Strategic Planning Process was on internal operations and the external environment. A review of relevant documents and one-on-one interviews, focus groups, and surveys of Board and staff informed the analysis of the internal capacities of Mano a Mano. The external analysis was based on telephone interviews conducted with key stakeholders in the community.

Vision and Strategic Directions — The Board and representative Mano a Mano staff participated in a daylong retreat during which they defined a common organizational vision for the future, recrafted Mano a Mano’s mission and values, and developed strategic directions for the next three years.

Action Plan — Following the retreat, Board and staff members volunteered to participate on committees whose mandate was to develop detailed action plans, outlining concrete steps and benchmarks for fulfilling the strategic directions identified during the retreat. The final Action Plan was presented to the Board for approval.
